

GCL Series-Submersible Level Transmitter

- ▶ Ranges from 150 mm wg to 160 m wg
- ▶ Seawater model with Duplex/Hastelloy Construction
- ▶ All Welded Sensor

The GCL series are submersible transmitters with on board signal conditioning for the LVDT sensor. The 1F transmitter has a recessed diaphragm protected by a plastic nose and features all stainless steel construction. The 2F transmitter has an exposed diaphragm and is suitable for use on clean liquids, sewage sludge, highly viscous liquids, and slurries. The 3F transmitter has a recessed diaphragm protected by a plastic nose and features Duplex/Hastelloy construction for sea water applications
